WATERSENSE Toilet Rebate Program:

Toilets account for nearly 30% of residential indoor water consumption. To help consumers reduce water use, the Environmental Protection Agency (EPA) developed the WaterSense program to identify toilets that use less water while still providing excellent performance. These toilets are certified by independent laboratory testing to meet rigorous criteria for both performance and efficiency. Only high-efficiency toilets that complete the third-party certification process can earn the WaterSense label.

If you're in the market for a new toilet, make it an EPA certified WaterSenselabeled toilet available at most hardware and plumbing supply stores in a wide range of brand names and prices. In addition to saving water and \$ every time you flush, you may be eligible for a rebate of up to \$50 per toilet.

To be eligible for the rebate, you must:

- Be a <u>water</u> customer, paying your water bill to the city of Kent
- Purchase an EPA certified WaterSense toilet from any hardware or plumbing supply store
- Replace an existing pre-1993-installed, 5 gallon-per-flush toilet in a residence or business in the city of Kent water service area (generally homes/buildings built prior to 1993)
- Complete and return the rebate application, including a copy of your receipt as proof of purchase, to the address indicated at the bottom of the application form.

Once your rebate is approved, you will receive a check in the mail within approximately 30 days. The rebate program is provided on a "first come, first served basis" while funds last.

The application must be received by the City within 90 days of toilet purchase to be eligible for this rebate. The City reserves the right to verify installation. If you have any questions, please contact Gina Hungerford, Project Manager at 253-856-5549.

Toilet Rebate Application

(for replacing an existing 5-gallon toilet with a 1.28-gallon toilet in homes generally built before 1991)
